Hr Analysis Dashboard Dataset

➢ Project Overview:

The **InnovateX HR Analytics Dashboard** project focuses on analyzing employee data to understand workforce trends, employee performance, and factors contributing to employee attrition. Organizations often struggle with high employee turnover, inefficient workforce planning, and lack of visibility into employee satisfaction and compensation patterns. This project aims to address these challenges by transforming raw HR data into meaningful insights using modern data analytics tools.

➢ Dataset Summary:

Rows: 1470
Columns: 19
Key Features:
Customer demographics: (**Age, Gender, and MaritalStatus**)
Compensation Information: Variables such as **HourlyRate, MonthlyIncome, and PercentSalaryHike** help analyze salary distribution and compensation trends.
Employee Performance and Satisfaction: Includes metrics such as **PerformanceRating, JobSatisfactionRating, and WorkLifeBalanceRating**, which indicate employee performance and satisfaction levels.

➢ Data Preparation Using DAX:

1. **Total Employees = DISTINCTCOUNT(Employee_Details[EmployeeNumber])**

2. **Total Attrition = CALCULATE(COUNT(Employee_Details[EmployeeNumber]), HR[Attrition] = "Yes")**

3. **Attrition Rate % =DIVIDE([Total Attrition],[Total Employees])**

4. **Avg Hourly Rate =AVERAGE(Employee_Details[HourlyRate])**

5. **Avg Monthly Income=AVERAGE(Employee_Details[MonthlyIncome])**

6. **Age Group =SWITCH(TRUE(),Employee_Details[Age] < 25,"Under 25",[Age] <= 34,"25 - 34", Employee_Details[Age] <= 45,"35 - 45","Over 45")**

➢ Dashboard Visualization:

a. KPI cards

- Total Employees
- Total Attrition
- Attrition Rate
- Avg Salary
- Avg Hourly Rate

b. Attrition Rate by Gender and Age Group

Visualization:
Clustered Column Chart

Axis:
Age Group

Legend:
Gender

Values:
Total Attrition

c. Attrition by Department

Visualization:
Bar Chart

Axis:
Department

Values:
Total Attrition

d. Employees by Job Role and Performance Rating

Visualization:
Stacked Bar Chart

Axis:
JobRole

Legend:
PerformanceRating

Values:
Total Employees

e. Average Hourly Rate by Department

Visualization:
Column Chart

Axis:
Department

Values:
Average Hourly Rate

f. Average Monthly Income by Job Role and Gender

Visualization:
Clustered Column Chart

Axis:
JobRole

Legend:
Gender

Values:
Average Monthly Income

g. Attrition vs Salary Hike

Visualization:
Scatter Plot

X-axis:
PercentSalaryHike

Y-axis:
Attrition

h. Top 10 Highest Paid Employees

Visualization:
Table

Fields:

EmployeeNumber
Department
JobRole
MonthlyIncome

Filter:
Top 10 by MonthlyIncome.

i. Marital Status Filter

Visualization:
Slicer

Field:
MaritalStatus

Purpose:
Allows users to filter the entire dashboard by:

- Married
- Single
- Divorced

➢ **Key Points :** From the analysis, the following insights were observed:

- Certain departments show **higher attrition rates** compared to others.
- Employees in the **25–34 age group** show relatively higher turnover.
- Some job roles have **higher salary levels than others**.
- Salary hikes appear to have a **relationship with attrition reduction**.
- Gender-based salary differences can be observed in some roles.

➢ Dashboard in Power BI

Finally, we built an interactive dashboard in **Power BI** to present insights visually.
